PROFESSIONAL SUMMARY

Fullstack Developer with over 1.5 years of hands-on experience in .NET (Backend), Java, and modern user interfaces. Strong background in building RESTful APIs and responsive frontend applications using React and JavaScript. Proven ability to translate business requirements into clean, scalable code. Experience with Azure, SQL Server, and version control using Git.

TECHNICAL SKILLS

Backend	Java, Spring Boot, .NET Core, ASP.NET, C#
Frontend	React, Angular, JavaScript, TypeScript, HTML5, Tailwind CSS
Databases	SQL Server, PostgreSQL, SQLite, MySQL
Cloud & Tools	Azure, Git, Docker, AWS, Render
Agile Methodologies	Scrum, Kanban
Languages	Portuguese (Native), English (C1)

EXPERIENCE

Systems Analysis and Development Intern **CAESB** 09/2025 – Present
- Automated data workflows, significantly reducing manual processing time.
- Demonstrated proactivity by identifying bottlenecks and proposing autonomous technical solutions.
- Collaborated with the team on maintenance of internal tools and integration scripts.

Fullstack .NET Developer – Freelance **GIS Tecnologia** 03/2025 – Present
- Developed and maintained complete web applications using ASP.NET Core and SQL Server.
- Implemented frontend interfaces using HTML, CSS, and JavaScript, integrated with APIs.
- Ensured code quality through best practices and continuous code reviews.
- Performed deployment and service maintenance with a focus on performance and stability.

Software Developer **Bincom Global** 11/2024 – 01/2025
- Assisted in backend development of .NET applications and system integrations.
- Worked on bug fixing and SQL database maintenance.
- Participated in code reviews and agile ceremonies (Scrum).

PROJECTS

StudyPlanner
Repository: GitHub | Site Online: StudyPlanner
- Fullstack application developed with Java 21 (Spring Boot 3) and React + TailwindCSS.
- Secure architecture with Spring Security and JWT, including password encryption and CORS configuration.
- Interactive dashboard with charts and local caching strategy for instant loading.
- Containerized environment with Docker and automated cloud deployment (Render and Vercel).

Financial Management System
Repository: GitHub
- Fullstack system for financial transaction tracking developed with .NET Core.
- Implemented business rules for input validation, categories, and cash flow reports.
- SQLite used as the database.
- RESTful API architecture following best practices, with frontend developed in React and TypeScript.

EDUCATION

Catholic University of Brasília *Brasília, DF, Brazil*
Associate Degree in Systems Analysis and Development Jan 2024 – Jan 2026 (Expected)
